

# TSX-8500: Continuous Insulation for Exterior Walls and Exposed Use Masonry Wall Application

TSX-8500 is applied to the interior face of concrete or concrete masonry to provide a layer of continuous insulation (ci) over the entire surface. It may be adhered or anchored directly to the concrete surface or attached to furring. Use Rmax PVC clips for an easy yet clean, professional installation. For example, TSX-8500 is an excellent product for use in insulating block walls, standard cavity walls and the underside of slabs such as ceilings of parking structures. It can also be used in conjunction with tilt-up wall panels.

Refer to TSX-8500 data sheet for additional application/installation, compliances, thermal and physical properties, limitations and warnings.

Warranty: See Rmax "Sales Policy" and "Fifteen Year Limited Thermal Warranty" for terms and conditions. Rmax does not assume any responsibility or liability for the performance of any products other than those manufactured by Rmax. **NOTE: All Rmax products must be tarped, placed on skids and kept dry before and throughout construction.**
